**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of claims 39-53, 57, and 58 in the reply filed on 8/11/04 is acknowledged. The traversal is on the ground(s) that the field of search is the same for the product and the process. This is not found persuasive because the product claims would not require a search in the area where semiconductor dies are back grinding while adding a second glass substrate on the backside of dies after back grinding.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of thin film semiconductor die package:

- A1. A semiconductor die package with a glass substrate.
- A2. A semiconductor die package with a metal substrate and glass layer.
- A3. A semiconductor die package with a first and second glass substrate with grinding of the backside of the die.

If applicant elects A1, applicant must further elect from the glass substrate:

- B1. A glass substrate with cavities.
- B2. A glass substrate without cavities.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
